How do I upload a vid?

Last Modified on 03/28/2024 11:37 am EDT

You just created your 1st awesome vid you want to upload – sexy or safe-for-work– it's totally up to you!

We have three ways to start uploading vids!

From any page

Just click the camera icon > Upload vid:

From the drop-down menu

- First go to your drop-down menu
- Dashboard
- Quick Links
- Upload Vids

From your profile page

Click the <Vids> tab and then the upload icon:

You will be brought to a page where you can either select or drag and drop the vid file you wish to upload!

Click "Select Vids to Upload" or drag and drop the vid file to the upload section or click "Select Vids to Upload" and locate the vid file. *Please note:* We accept MP4, M4V and MOV files.

Once added, your vids will begin uploading right away! When fully uploaded, the vid will then begin Processing which means the file has reached our servers and is being converted for streaming and download purposes.

During processing you can click <Edit Info> to add all the details to your vid such as the title, description, tags, price, etc.

When the vid is fully processed, click <Launch> to do a final check on all the details and create a teaser and thumbnail for your vid.

How long does it usually take to upload a vid?

On average every vid takes about 5 mins to upload and then about 2 minutes to edit (that is: set your price, enter a description, select a cover image, etc.). Uploading time will depend on file size, speed of your internet connection, and the length of your vid.

Still have more questions about uploading your content? You can watch our *MVU* class, *How to Upload Your First Vid on MV!* This episode covers everything you need to know about uploading your vids on the platform, by offering you tips and tricks to make the uploading process as easy as possible!
