

How do I set my Vid Bundle to Stream Only?

Last Modified on 02/05/2024 4:11 pm EST

You can change your Vid Bundle service to "Stream Only" which will mean purchasing members will not be able to download your vids through your Vid Bundle, even if your vids are not individually set to Stream Only (to find out how to set specific vids to Stream Only, [click here](#)).

To set this up, go to the:

1. Dashboard (drop down menu > dashboard)
2. Revenue tools (under Manage My Store)
3. Click "View" next to Vid Bundle
4. At the bottom of the Vid Bundle section, there's a box that says "Make all Vid bundle vids Stream Only". Check the box, hit Save, and now your Vid Bundle is Stream Only!

The screenshot shows a 'Create A Membership' section with three rows of membership options. Each row includes a description, a price input field set to '\$ 0.00', a monthly rate of '\$0.00/ month', and a 'Best Deal' checkbox with an information icon. The 'Make all membership vids Stream Only' checkbox is checked and highlighted with a white background. Below the options is a link to 'Click here to customize your membership.' A dark grey banner at the bottom of the screenshot contains the text: 'The option to make your Vid Bundle stream only is available at the bottom of your Vid Bundle settings.'
