

How do I offer Custom Vids on my Profile?

Last Modified on 01/08/2025 6:44 pm EST

Custom Vids allow Members to order vids from their favorite Creators that are exactly to their liking by providing a sexy script to follow!

To offer this service:

1. Go to the drop down menu
2. Dashboard
3. Manage my store
4. Revenue tools
5. "View" next to Custom vid

You can create multiple different packages by duration (in minutes) and price; the cost per-minute will be automatically calculated. To remove an option you have created, click the trash can icon next to it.

Set *Extras* for members to add to their order as special props, accessories, special gestures and requests!

These can be free add-ons or be set at a price. To delete an extra, click the trash can icon next to it.

You can also offer different resolutions for the final vid at different prices. Toggle the option next to the listed resolutions and set a price.

Standard resolution will always be available at no extra cost.

You can offer to deliver the vid faster at a higher price by setting different delivery time options!

You can even offer exclusivity at a price, meaning the vid will be for their eyes only.

Once you're done adding all your options, make sure to hit <Save>!

NOTE: You must have a minimum of two packages created in order for the <Save> button to appear. Additionally, the minimum minute rate is \$1.99/minute.

If you ever need to take a break from filming custom vids you can simply hide the service by selecting "Pause" at the bottom of the page and save the changes. When you're ready to offer them again, simply toggle back on and save again!
