

How do I view my Followers on MV?

Last Modified on 02/05/2024 5:42 pm EST

Following other accounts is a great way to get new Followers, but what if you want to check out accounts you have already followed or have followed you?

To do so, simply:

- Go to your profile (drop down menu > My Profile)
- Click the Following or Followers option– both will take you to the Followers page!

How do I view new followers?

New followers will be highlighted in your followers list with a "NEW" tag!

This tag will be visible for 5 days!

How do I filter my followers or make my follower private?

You can filter your followers by using the filter on left side of the Followers page. Simply select which followers you want to view! You can have it set to display ALL followers, Members or Creators.

If you want to make your followers private or public, you can toggle the settings to your preference. See below:

Settings & Filters

Who can see your followers?
Private Public
