

MV Store Item ribbons!

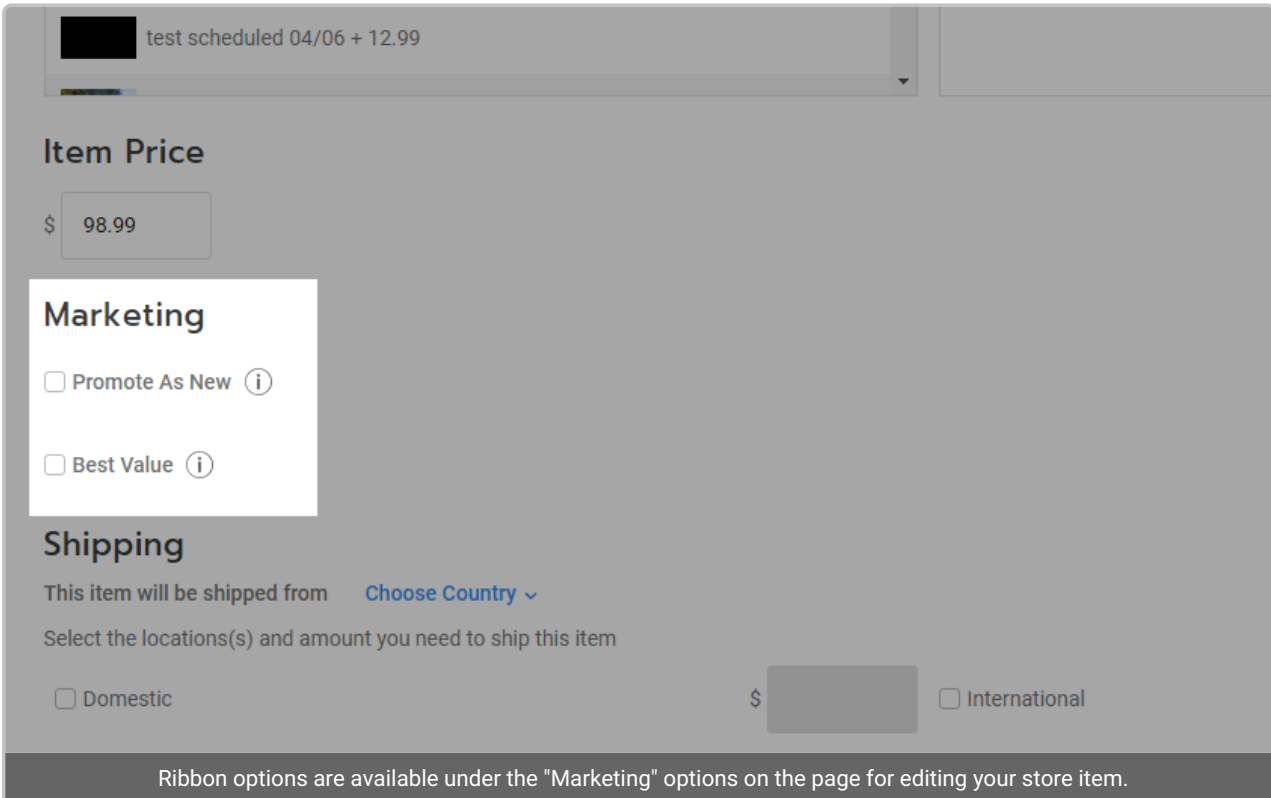

Last Modified on 06/29/2023 3:59 pm EDT

Want to promote your new and bargain-priced Store items? We make it so easy to self-promote with ribbons!

What are the ribbons and how do they work?

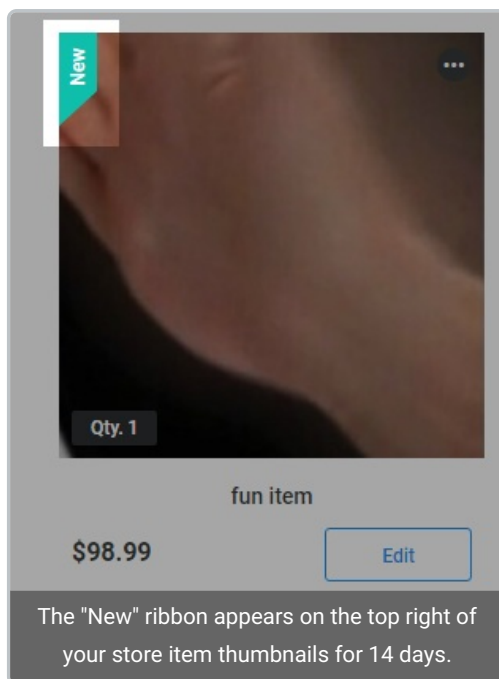

We have 2 ribbons for you to choose from: **Best Value** and **New!** Select these options under the 'Marketing' section of your item and your store item will display these ribbons.

Store items can be highlighted as new or best value by checking the the "Promote As New" or "Promote As Best Value" check boxes.

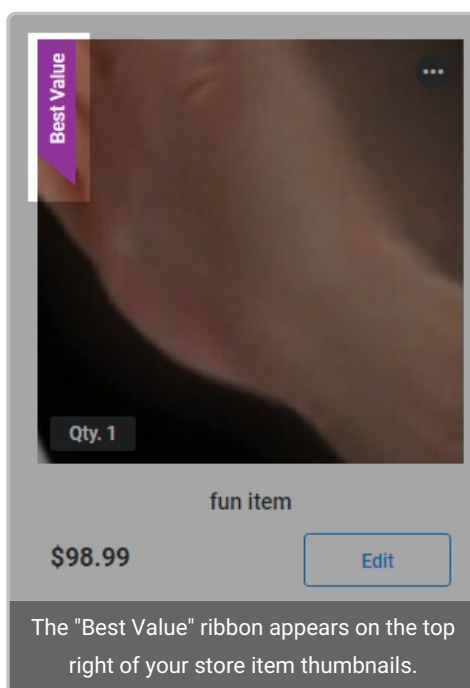

The screenshot shows a user interface for editing a store item. At the top, there is a header with a blacked-out name and a date: "test scheduled 04/06 + 12.99". Below this is a section titled "Item Price" with a price input field set to "\$ 98.99". A white modal box titled "Marketing" is open, containing two options: "Promote As New" and "Best Value", each with an unchecked checkbox and an information icon. Below the marketing options is a "Shipping" section. It starts with "This item will be shipped from" followed by a "Choose Country" dropdown. Below that is the instruction "Select the locations(s) and amount you need to ship this item". There are two shipping options: "Domestic" with an unchecked checkbox and "International" with an unchecked checkbox. A price input field is visible between the two options, currently empty. At the bottom of the interface, a dark grey banner contains the text: "Ribbon options are available under the 'Marketing' options on the page for editing your store item."

The **New ribbon** can be applied to as many Store items that you want and it will last a total of 14 days for each item. At that point, it can be manually re-added if you want the ribbon to be displayed longer. The <Edit> section will also display how many days are left before the ribbon expires.

The **Best Value ribbon** can be added to a *maximum of 3 items at a time*. To change which item is displaying the ribbon, you can simply remove it from a store item and add it to another one.
