

## Mobile Unified Upload Flow

Last Modified on 06/25/2025 4:45 pm EDT

The **new unified upload flow** empowers mobile Creators with a fast, intuitive, and streamlined way to publish content—whether you're **going live**, **uploading videos**, or **posting photos**—directly from your device.

---

## Navigation Overview

From the bottom navigation bar, you'll find quick access to everything you need:

- **Star icon** – Creator Lander Page
- **MV Locket icon** – Clubs Lander Page
- **Webcam icon** – Live Lander Page
- **Shopping Bag icon** – Marketplace Lander
- **News icon** – ManyVids Club for updates, promos & releases
- **Trophy icon** – Contest Page

**Most importantly:** Tap the centered **Plus Sign** in the navigation bar to access the **Unified Upload Flow** and choose from one of the three upload options: **Camera**, **Library**, or **Go Live**

---

## Upload Source Options

Below are the three unified upload flows that make sharing your media seamless and efficient:

### 1. Camera Upload Flow

Capture content in real time using your device's camera.

#### Steps:

1. Tap **+** → Choose Upload Source → Camera
2. Check Camera Support:
  - You'll be prompted to **grant camera access**.
3. Determine Content Type
  - **Photo:** Process → Optionally Edit Photo
  - **Video:** Process → Optionally Edit Video
4. Content continues into the Unified Post-Processing Flow

### 2. Library Upload Flow

Upload media that already exists in your device's library.

#### Steps:

1. Tap  → Choose Upload Source → Library
2. Allow access to your media library
3. Determine Content Type
  - **Photo:** Process → Optionally Edit Photo
  - **Video:** Process → Optionally Edit Video
4. Content continues into the Unified Post-Processing Flow

## 3. Go Live Flow

Stream video live and engage with your audience in real time.

#### Steps:

1. Tap  → Choose Upload Source → Go Live
2. Check Camera Support
  - Prompt to grant camera access
3. Input your Room Topic
4. Tap **Go Live** to begin streaming

## Unified Post-Processing Flow

*(Applies to Camera and Library uploads)*

No matter how you upload, the following steps help finalize your content:

1. **Edit Details** – Add a title, description, and assign to a community
2. **Add Co-Performer (if applicable)** – Tag collaborators or upload the co-performer documentation
3. **Add Price** – Set pricing if monetizing
4. **Launch**– Launch to relevant services or offerings

---

## Conclusion

This new upload flow is built for flexibility and speed, tailored to your creative process:

- **Camera:** Great for on-the-go content creation
- **Library:** Ideal for polished, pre-edited media
- **Go Live:** Perfect for spontaneous, real-time engagement

Whether you're snapping a photo, uploading a clip, or broadcasting live, the unified upload flow ensures an easy, consistent experience every time.
